

March 4, 2022

To our customers and partners,

The recent invasion of Ukraine has raised some questions regarding our supply chain among our customer base. During this challenging time, NMB Technologies Corporation is committed to providing reliable and uninterrupted support to our customers. Our factories are located outside of Europe, and are not affected at this time. Supply is continuing smoothly. We are monitoring the situation closely, and will provide updates promptly should this situation change.

We send our hopes and prayers to the people of Ukraine for their safety, and for a rapid end to the hostilities.

We remain grateful to our customers for your continued business.

Sincerely,

Richard LaPlace
President, NMB Technologies Corporation
